

EJSO—European Journal of Surgical Oncology

the Journal of Cancer Surgery

Aims and Scope

The *EJSO* aims to educate and inform about the many subspecialty disciplines of cancer surgery. The *EJSO* publishes original scientific articles, reviews, clinical trials, and other relevant subject material. The Journal seeks to capture the interest and attention of its worldwide print and electronic readership through excellence, clarity, simplicity and concise presentation of the written word, figure, table and diagram.

The Editors welcome submissions from prospective authors on any subject of relevance to cancer surgical practice. The journal publishes Editorials; original scientific articles; specialist and general Review Articles; Educational Articles; For Debate Articles; Short Reports and Comments; and Letters in response to previously published items. Research areas include: epidemiology and preventative aspects of surgical oncology; diagnosis, including imaging; all aspects of cancer therapy, including radiotherapy and chemotherapy; the application of new equipment and procedures to surgical and clinical oncology; methods of assessing the results of treatment, including clinical trials; and computing and data management in relation to surgical oncology.

EJSO is abstracted/indexed by: *Current Contents*, *Science Citation Indexed Expanded*, *Index Medicus*, *PubMed/Medline*, *ASCA*, *EMBASE* and *Controlled Trials Register*. Also covered in the abstract and citation database SCOPUS®.
